

Community of Practice: Beyond the Intro & Overview of ERS

What is a Community of Practice (CoP)?

A community of practice is a group of individuals who share a common interest or expertise, coming together to learn from one another, collaborate, and deepen their knowledge in that specific domain. These communities foster a sense of belonging and encourage informal knowledge exchange. The benefits of communities of practice include enhanced learning and support for child care providers, making it easier for them to improve their childcare environments and provide quality care.

Child Care Aware of NH's Community of Practice: Beyond the Intro & Overview of ERS is a supportive network where child care providers like you can connect, share experiences, and **gain a deeper understanding of ERS**. By being part of this community, you'll benefit from collaborative learning, **insights, and practical tips for improving your child care setting using ERS**. Past topics have included: outdoor play, transitions, materials, interest centers, and more.

Join us and discover a community that's guided by the questions and needs of child care providers, just like you.
